SUMMARY

Final-year Computer Science Engineering student with hands-on UI/UX design experience through multiple internships. Skilled in Figma for wireframing, prototyping, and high-fidelity UI design, with knowledge of user-centered design, responsive interfaces, and design systems. Familiar with HTML, CSS, JavaScript, and React, enabling smooth collaboration with development teams. Seeking an entry-level UI/UX Designer role to create intuitive and engaging digital experiences.

EDUCATION

Prathyusha Engineering College

Sep 2023 - Apr 2027

Bachelor of Engineering, Computer Science and Engineering

- Coursework:** Software Engineering, Web Applications, Object-Oriented Programming, Database Management Systems, Cloud Computing, Data Science, Information Security, Artificial Intelligence, Machine Learning, Distributed Systems

SKILLS

- Design Tools:** Figma (Wireframing, Prototyping, Auto Layout, Components)
- UI Design:** Visual Design, Color Theory, Typography, Responsive Layouts
- UX Fundamentals:** User Flows, Basic User Research (Forage UX Design Simulation)
- Programming Languages:** Python, Java, R, HTML, CSS, JavaScript, React
- Databases:** MySQL, MongoDB, NoSQL
- Cloud Technologies:** AWS, Google Cloud Platform (GCP)
- Other Tools:** Git, GitHub, Postman, Tableau, VS Code, IntelliJ

UI/UX DESIGN EXPERIENCE

CodeAlpha

May 2026 - Jun 2026

UI/UX Design Intern

- Designed and prototyped a **Travel Booking Website** in **Figma**, creating low-fidelity wireframes and high-fidelity UI screens with responsive layouts, reusable components, and user-centered design principles.
- Conducted **UX research** and a detailed **Flipkart UX case study** by analyzing user journeys, identifying usability issues, and recommending data-driven improvements to enhance the overall user experience.
- Applied **wireframing, prototyping, information architecture, visual hierarchy, typography, color theory, and usability principles** to develop intuitive, accessible, and visually consistent digital interfaces.

Sam AI Technologies

Jun 2026 - Jul 2026

UI/UX Design Intern

- Designed user-centric interfaces using **Figma**, creating wireframes, high-fidelity mockups, and interactive prototypes for web and mobile applications.
- Designed intuitive and user-centered interfaces for web and mobile applications using **Figma**, focusing on usability and accessibility.
- Delivered multiple UI design projects, including **Button Set Redesign**, **Email Template**, and **Restaurant Menu Interface**, following modern design standards.

CERTIFICATIONS

- UX Design Introduction Simulation
- Python for Data Science
- Claude with Google Vertex AI
- Cloud Computing
- SAP Business Data Cloud

TECHNICAL PROJECTS

Customer Segmentation

- Developed a customer segmentation model using **K-Means Clustering** to group customers based on annual income and spending behavior.
- Performed **data preprocessing, feature scaling, and exploratory data analysis (EDA)** to prepare the dataset and improve clustering performance.
- Applied the **Elbow Method** to determine the optimal number of customer segments for accurate clustering.
- Visualized customer clusters using **Matplotlib** and **Seaborn**, enabling clear interpretation of customer behavior and purchasing patterns.

AI Resume Analyzer

- Designed and developed an AI-powered Resume Analyzer with an intuitive dashboard for ATS scoring, AI recruiter feedback, and personalized resume improvement recommendations.
- Integrated Groq AI to generate recruiter reviews, resume rewrites, cover letters, and interview preparation content, enhancing the overall user experience.
- Designed a scalable design system with reusable UI components, consistent typography, color styles, and interactive elements for a cohesive interface.
